

# Table of Contents

## Exercise Theory: Chpt One – 1

What Is a Theory? 2

Establishing a theory 3

Rules of hypothesizing 4

Theory types 5

What Is Exercise? 6

## Prescribed Exercise: Chpt Two – 9

Principle of Intensity 13

The aerobic industry & Borg's Exertion Scales 14

Is intensity something other than effort? 15

Energy systems (aerobic/anaerobic) 20

The nature of intensity 27

Problems with intensity prescription 29

Those who should not train to failure 30

Importance of sub-failure exercise 31

Rational restraint & progress 33

Determining appropriate intensity 32

Volume Principle 36

Muscle fiber types & exercise application 36

Fiber type relevancy in exercise prescription 38

Frequency Principle 40

Progression - Overload (load) Principle 40

Overload methods 41

Overload and TUT 42

Strength & endurance relationships 43

Cautions of weight overload 44

When the weight becomes too heavy 45

Overload and set number 47

Overload and intensity of effort 48

Long-term overload reality 50

# Prescribed Exercise (con't)

## SAID Principle 51

### Sport specificity 52

Negative transfer 53

## Principle of Diminishing Returns 54

### Objectives 55

## Principle of Individualism 56

### Bell Curve distribution 58

### Key aspects of Individualism 60

### Biological clocks 62

Components of a rhythm 63

Sleep patterns and performance 66

Monthly cycle 72

Circannual cycle 75

Biocycle exercise considerations 76

Body temperature 76  
Body rhythm adaptations to exercise strain 77

Nutrition rhythms 77

Late night eating 77  
Erratic eating 78  
What and when to eat 78  
Sufficient calories to normalize rhythmic patterns 80  
Cyclic dieting methods 81

### Individualism governs exercise 82

### Individualism & exercise consilience 85

Consilience & Individualism 88

Warm-up & Cool-down 287  
Exercise Elements 299  
Exercise Directions 399  
Problem Solving 647

# Exercise Origins: Chpt Three – 91

## The Universe 91

## Laws of Reality 94

### Law of Existence 95

### Law of Identity 95

Cause and Effect 96

Necessary cause 97  
Sufficient cause 97  
Unique cause 98

# Exercise Origins (con't)

## Laws of Reality (con't)

Law of Non-contradiction 98  
Law of Excluded Middle 99  
Law of Consciousness 100

Philosophical 'Grand Unified Theory' 103

Laws of Reality in exercise science 103

## Philosophy 105

Acquisition of knowledge 106

Philosophical background 106

Sense perception 107

Man's method of survival 107  
Abstracting and conceptualizing exercise 109

Philosophical importance & limitations of principles 109

Foundations of philosophy 111

Metaphysics 109  
Epistemology 109  
Ethics 109  
Politics 109  
Esthetics 110

Definitions 113

What is a definition? 114

What definitions are not 115

Elements of a definition 115

Rules for constructing valid definitions 116

Equivalence;  
Fundamentality;  
Clarity; Negatives;  
and  
Obscurity 117

Definitions in the exercise industry 117

## Numbers 122

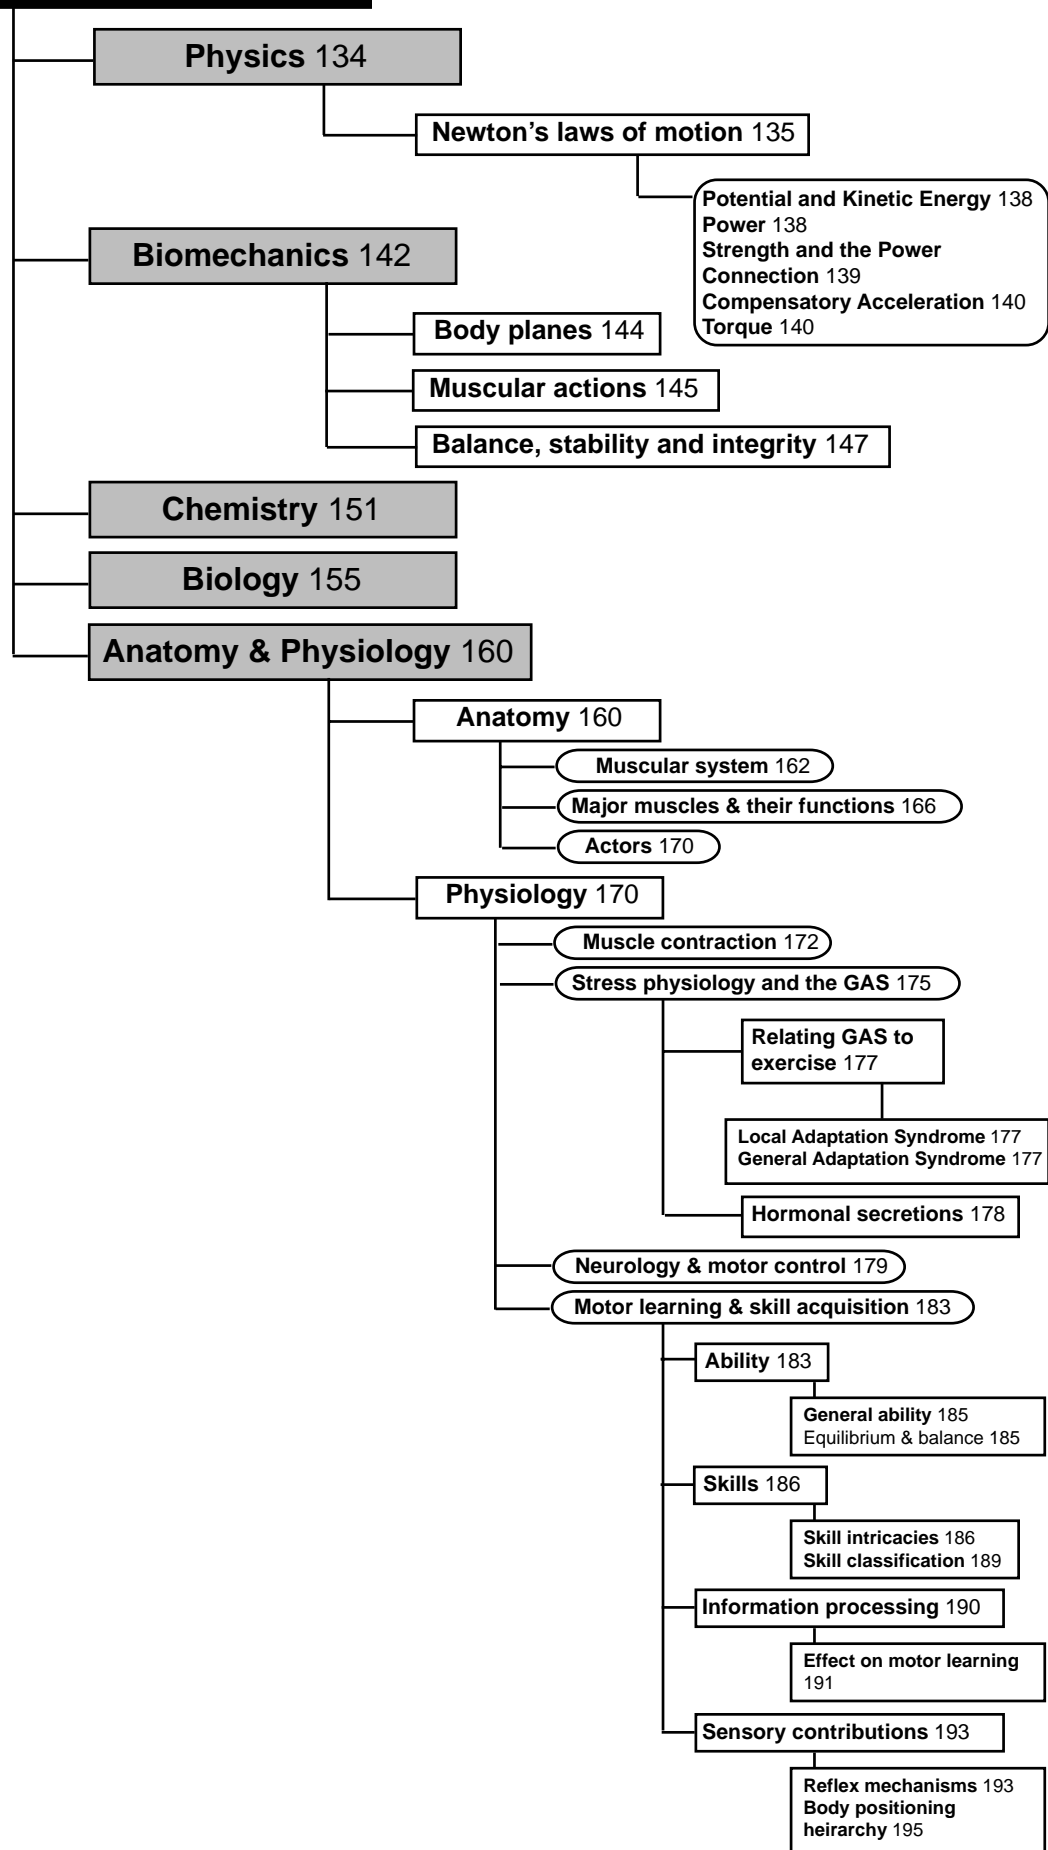

Numerical symbolism & mysticism in exercise 123

Measurement 125

Measurements in exercise science 126

Mathematics 131

# Exercise Origins (con't)

# Exercise Origins (con't)

## Anatomy & Physiology (con't)

### Physiology (con't)

#### Motor learning & skill acquisition (con't)

Central contributions 196

Coordination 197

Levels of control 197  
Errors in program selection 199  
Errors in program execution 199

Principles of simple movement 199

Speed-accuracy trade-off 200  
Force-variability 200  
Specificity 200

Practice specificity 201

Practicing for automaticity 201

Skill transference 203

Transferring everyday skills to  
exercise skills 203  
Skill retention and transfer 203  
Designing specific activity  
practice sessions 204

## Genetics 205

Genetics & health factors 206  
Genetics & susceptibility 209  
Genetics & environmental factors 212

Performance & health 213

Genetics in exercise science 215

Factors affecting trainability & results 219

Environment 219

Exercise order selection 220  
Everyday stress 223

Intrinsic factors 223

Leverage 223  
Muscle length; fiber types 226  
Fiber density; Neuromuscular  
efficiency 227  
Somatotype 228  
Cardiac function 231  
Tolerance to discomfort;  
Motivation & desire 233

Realizing limitations 233

Reality check; what to expect; progress  
expediency 235

## Exercise 236

Exercise as a branch of medical science 236

## Exercise Technique: Chpt Four – 239

Mechanical Similarities 239 & 245

Technical Skill Analysis 240

Method of Instruction 243

Breathing 243

Thigh Exercises 245  
Calf Exercises 253  
Pectoral Exercises 255  
Back Exercises 259  
Deltoid Exercises 265  
Neck Exercises 270  
Abdominal Exercises 272  
Arm Exercises 274  
Clean and Jerk 277

## Warm-up & Cool-down: Chpt Five – 287

Warm-up 287

Warm-up prescription 288

Choosing the correct warm-up exercises 290

Exercise complexity 291

Results of a proper warm-up 291

Warm-up procedure 292

Stretching 293

Reasons & considerations 293

Consequences of inflexibility & flexibility 293

Types of stretching 294

Dynamic; Static 294  
PNF 295

The role of stretch reflexes 296

Stretching prescription 296

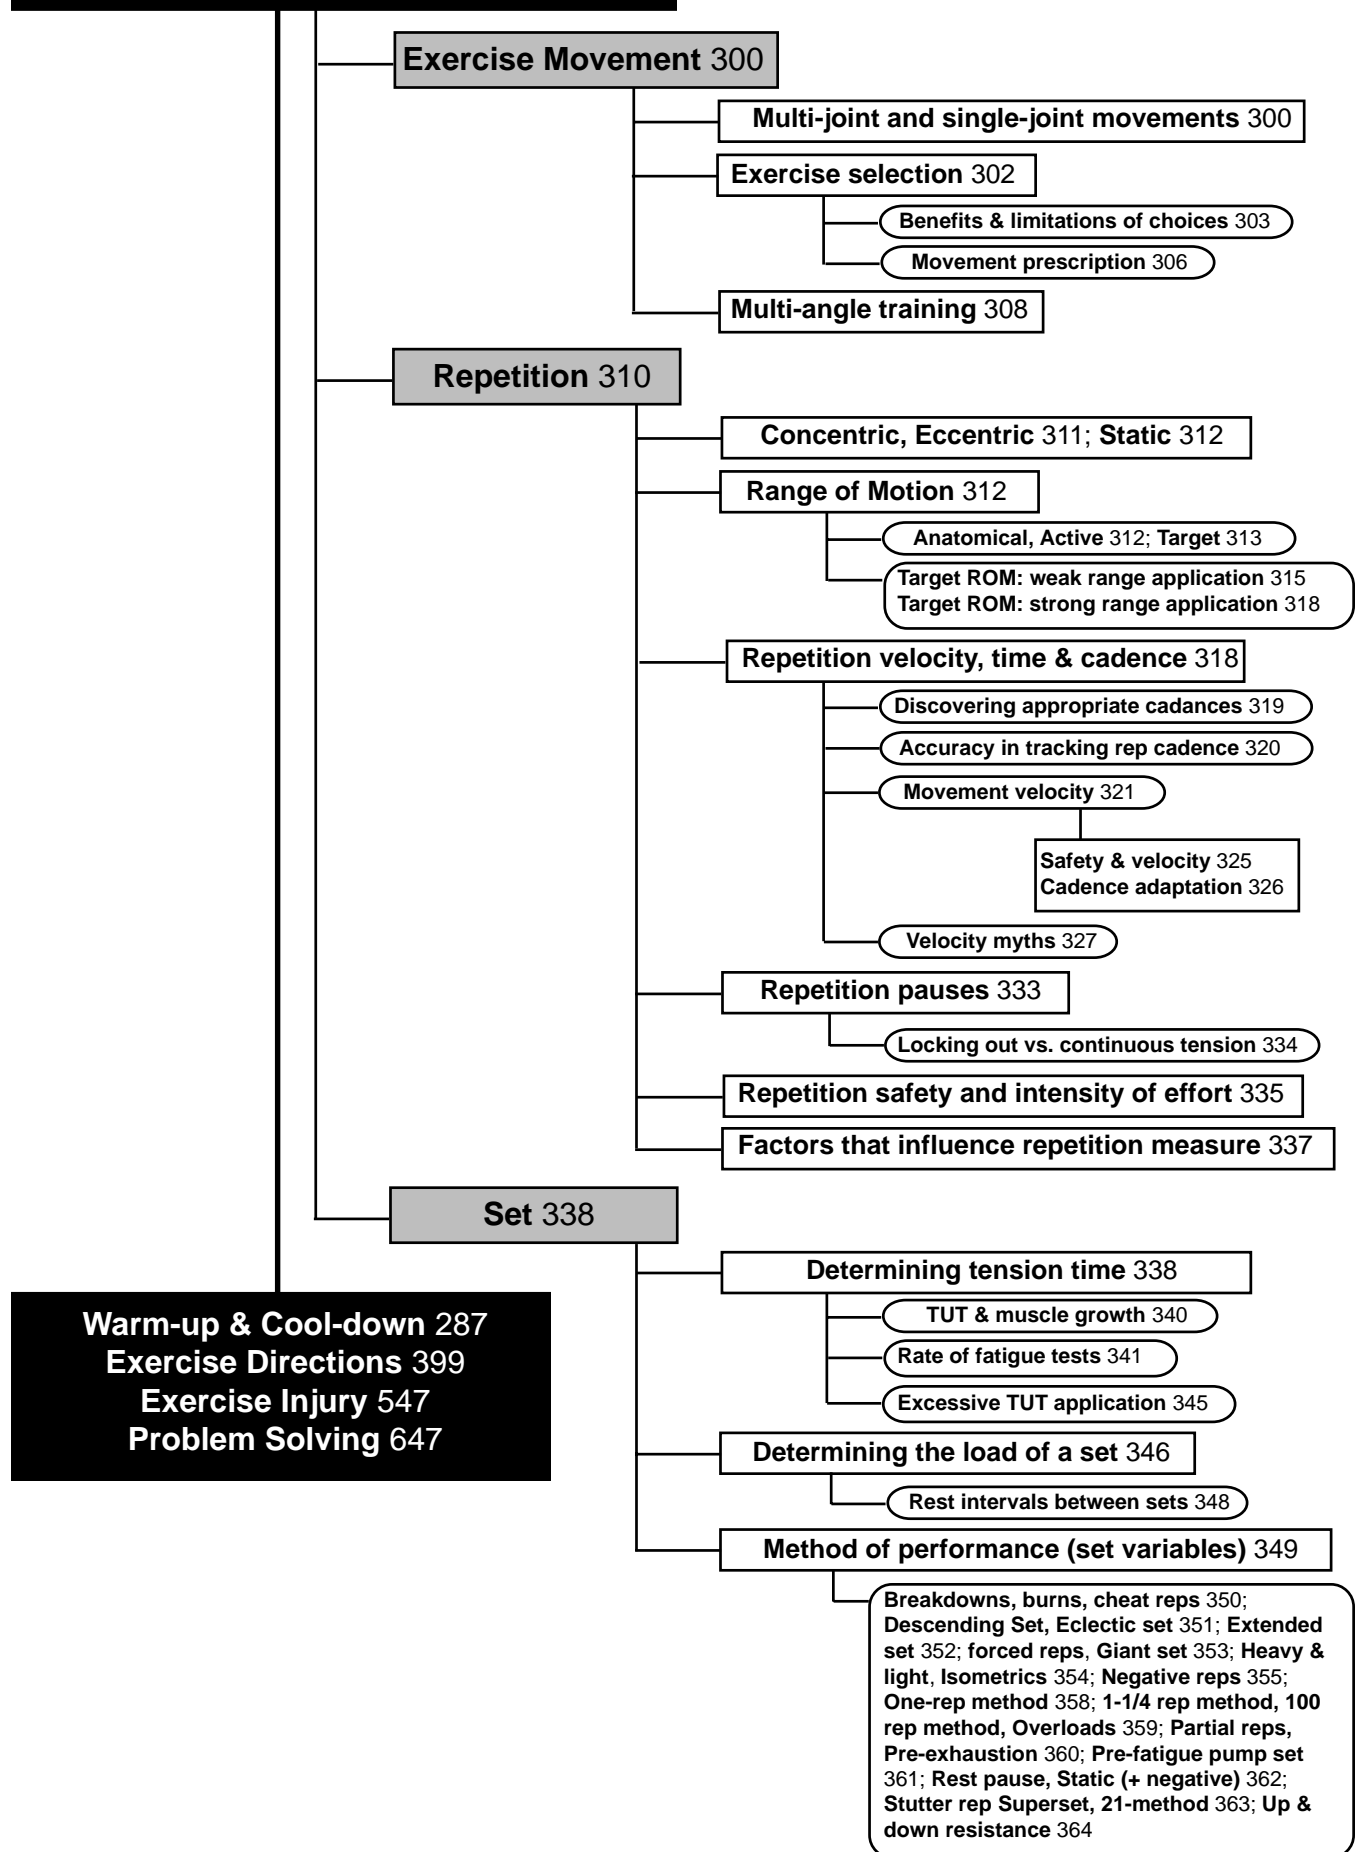

Common stretches 297

Cool-down 298

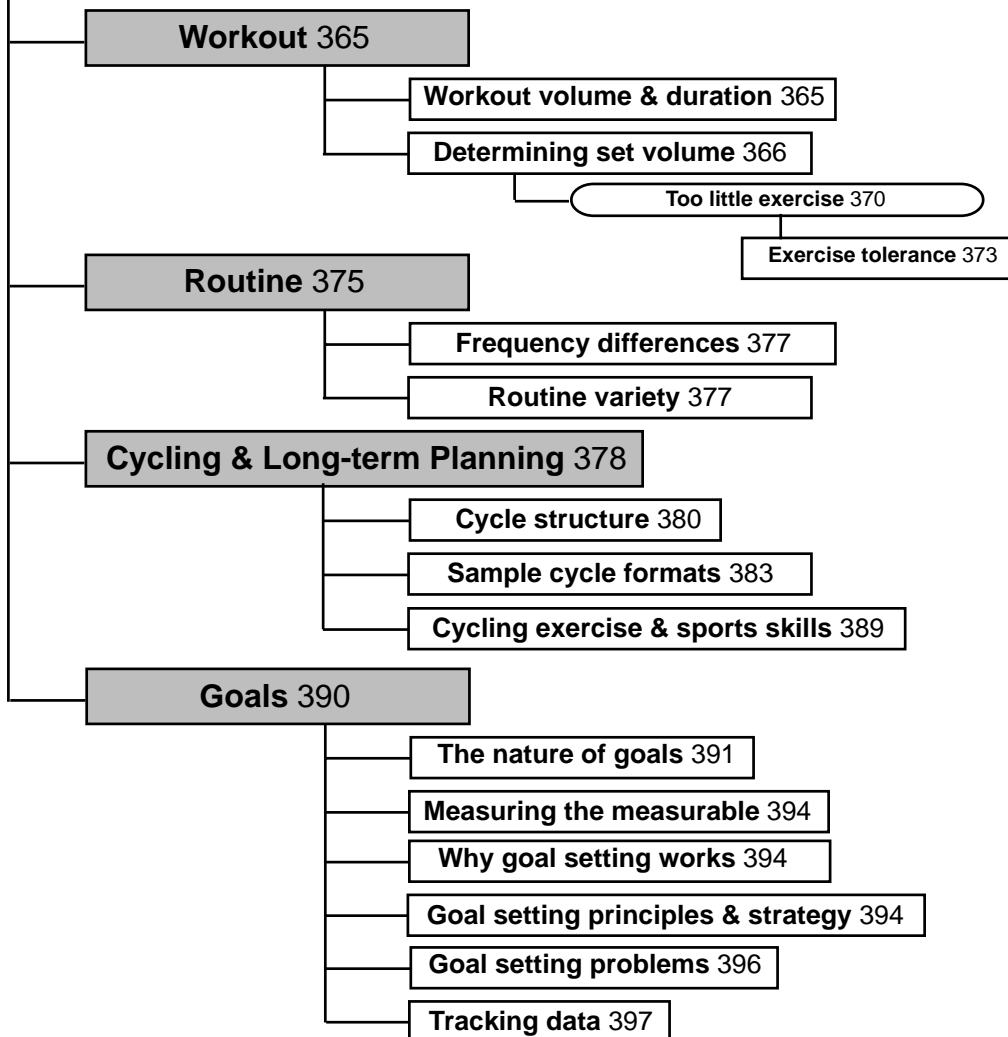

Methods 298

Exercise Elements 299

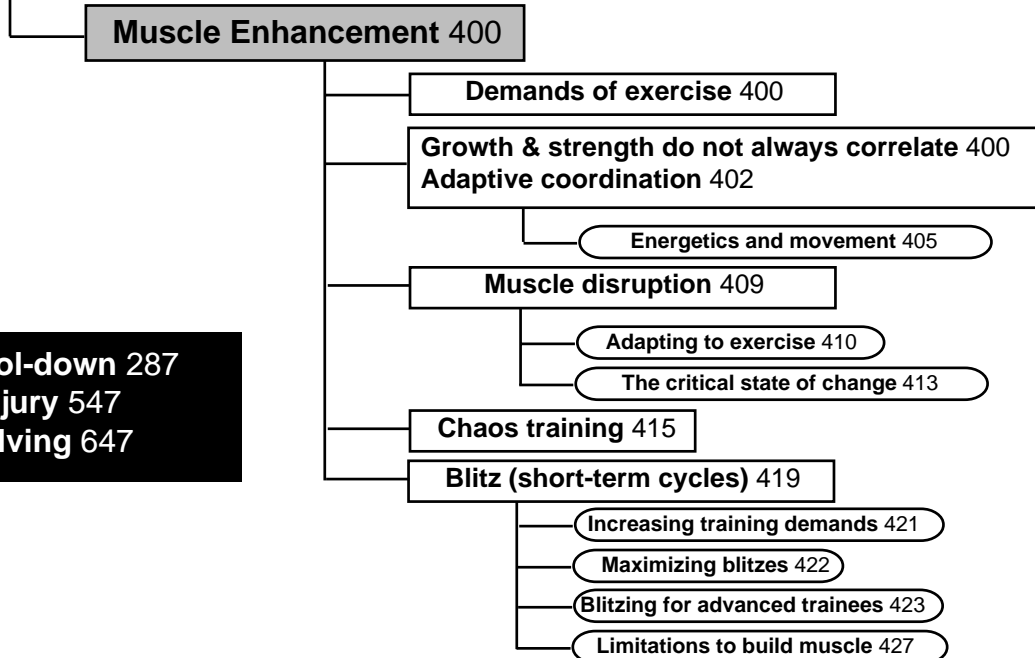

# Exercise Elements: Chpt Six – 299

## Exercise Elements (con't)

## Exercise Directions: Chpt Seven – 399

## Exercise Directions (con't)

### Physique Transformation 428

Weight training application 430

Endurance training & nutrition 432

Looking one's best 434

### Powerlifting 435

Building strength vs. lifting proficiency 437

Characteristics & technique of the lifts 438

Supplemental movements 439

Causes for disqualification 441

### Endurance Training 442

The necessity for aerobic activity 443

Enhancing weight training 444

Obtaining an aerobic benefit 444

Maximizing aerobic capacity 445

Endurance training for fat loss 446

Cardiovascular response from weight training 447

Cardio effects from eccentric exercise 448

### Pliometrics 449

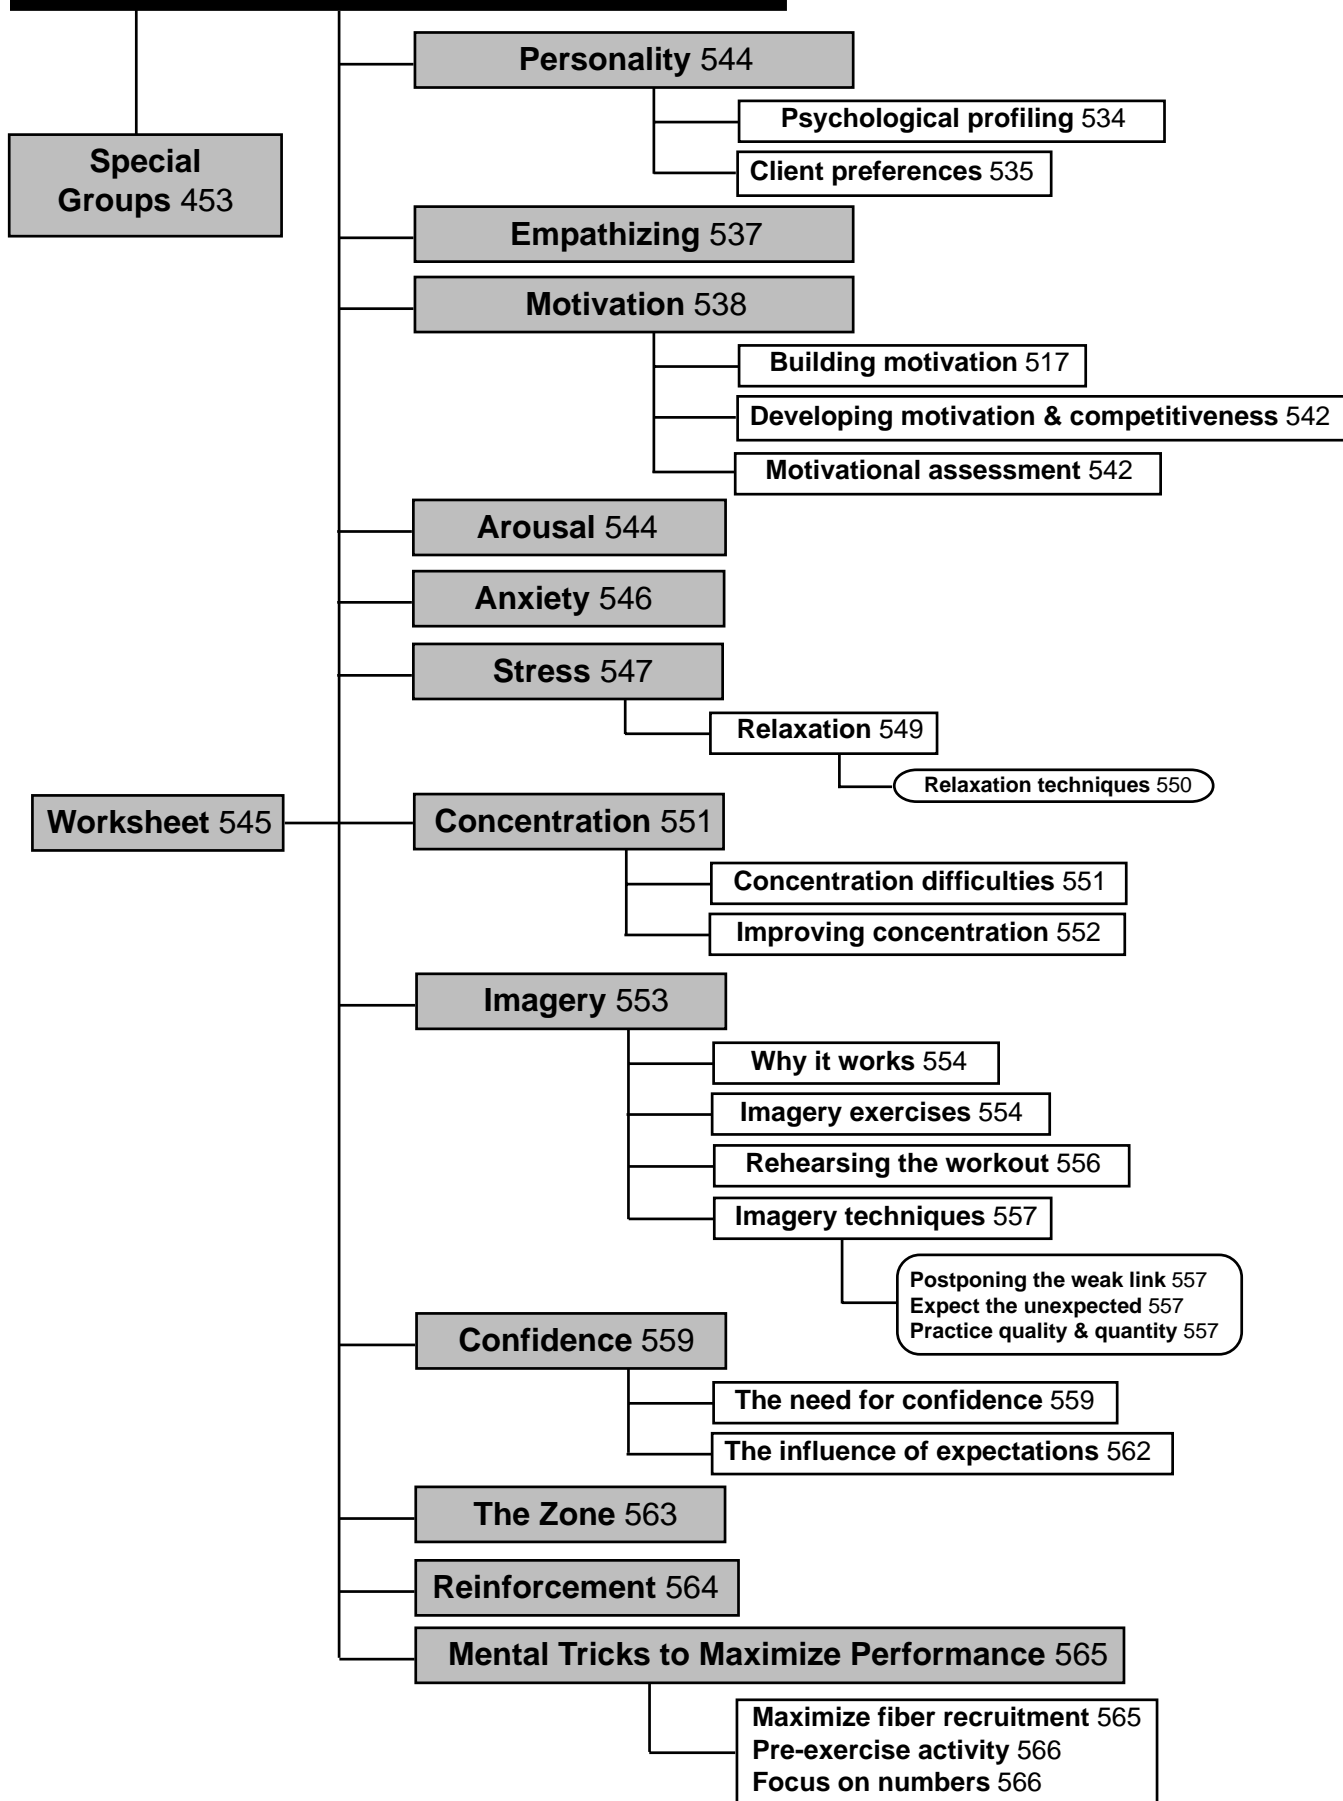

Pliometrics & injury 449

Pliometrics & the growth mechanism response 451

### Special Groups 453

AIDS 454; Adolescents & children 455; Alzheimer disease & dementia 457; Amputation 459; Arthritis 461; Asthma 470; Athletes (and injuries) 472; Brain injury 475; Cancer 476; Cardiovascular disease 477; Cerebral palsy 486; Deafness & the hearing impaired 488; Diabetes 490; Down Syndrome & mental retardation 492; Eating disorders 495; Epilepsy & seizures 496; Fibromyalgia 498; Hypertension 499; Mature adult 502; Menopause 517; Multiple sclerosis 518; Muscular Dystrophy 520; Osteoporosis 521; Parkinson's Disease 522; Pregnancy 523; Spinal cord disabilities 526; Visually impaired 528

# Sport Psychology: Chpt Eight – 533

# Exercise Injury: Chpt Nine – 569

## Body Mechanics 570

Balance & stability 570

Principles & application of lifting 571

Fundamental positions 572

Standing 572; Sitting, Lying 573

Exercises in the fundamental positions 574

Factors that influence body mechanics 574

## Injury Factors 575

The nature of an injury 575

Exercise as a factor 576

Cause and effect 576

Macrotrauma & microtrauma 578

Eleven weight room safety tips 581

## Tissues 583

Bones 583

Adaptation, Aging 583;  
Fractures 584

Cartilage 589; Joints 590;  
Bursa 593; Tendons 593;  
Ligaments 597; Muscles  
598; Nervous tissue 602;  
Skin 603

Flexibility 603

Controversial stretches 605

Inflammation 607

## Common Injury Sites 608

Lower back 608; Shoulder 611;  
Wrist 612; Elbow 613; Hip 614;  
Knee 614

Common sites of exercise injuries 615

Common exercise injuries & disorders 616

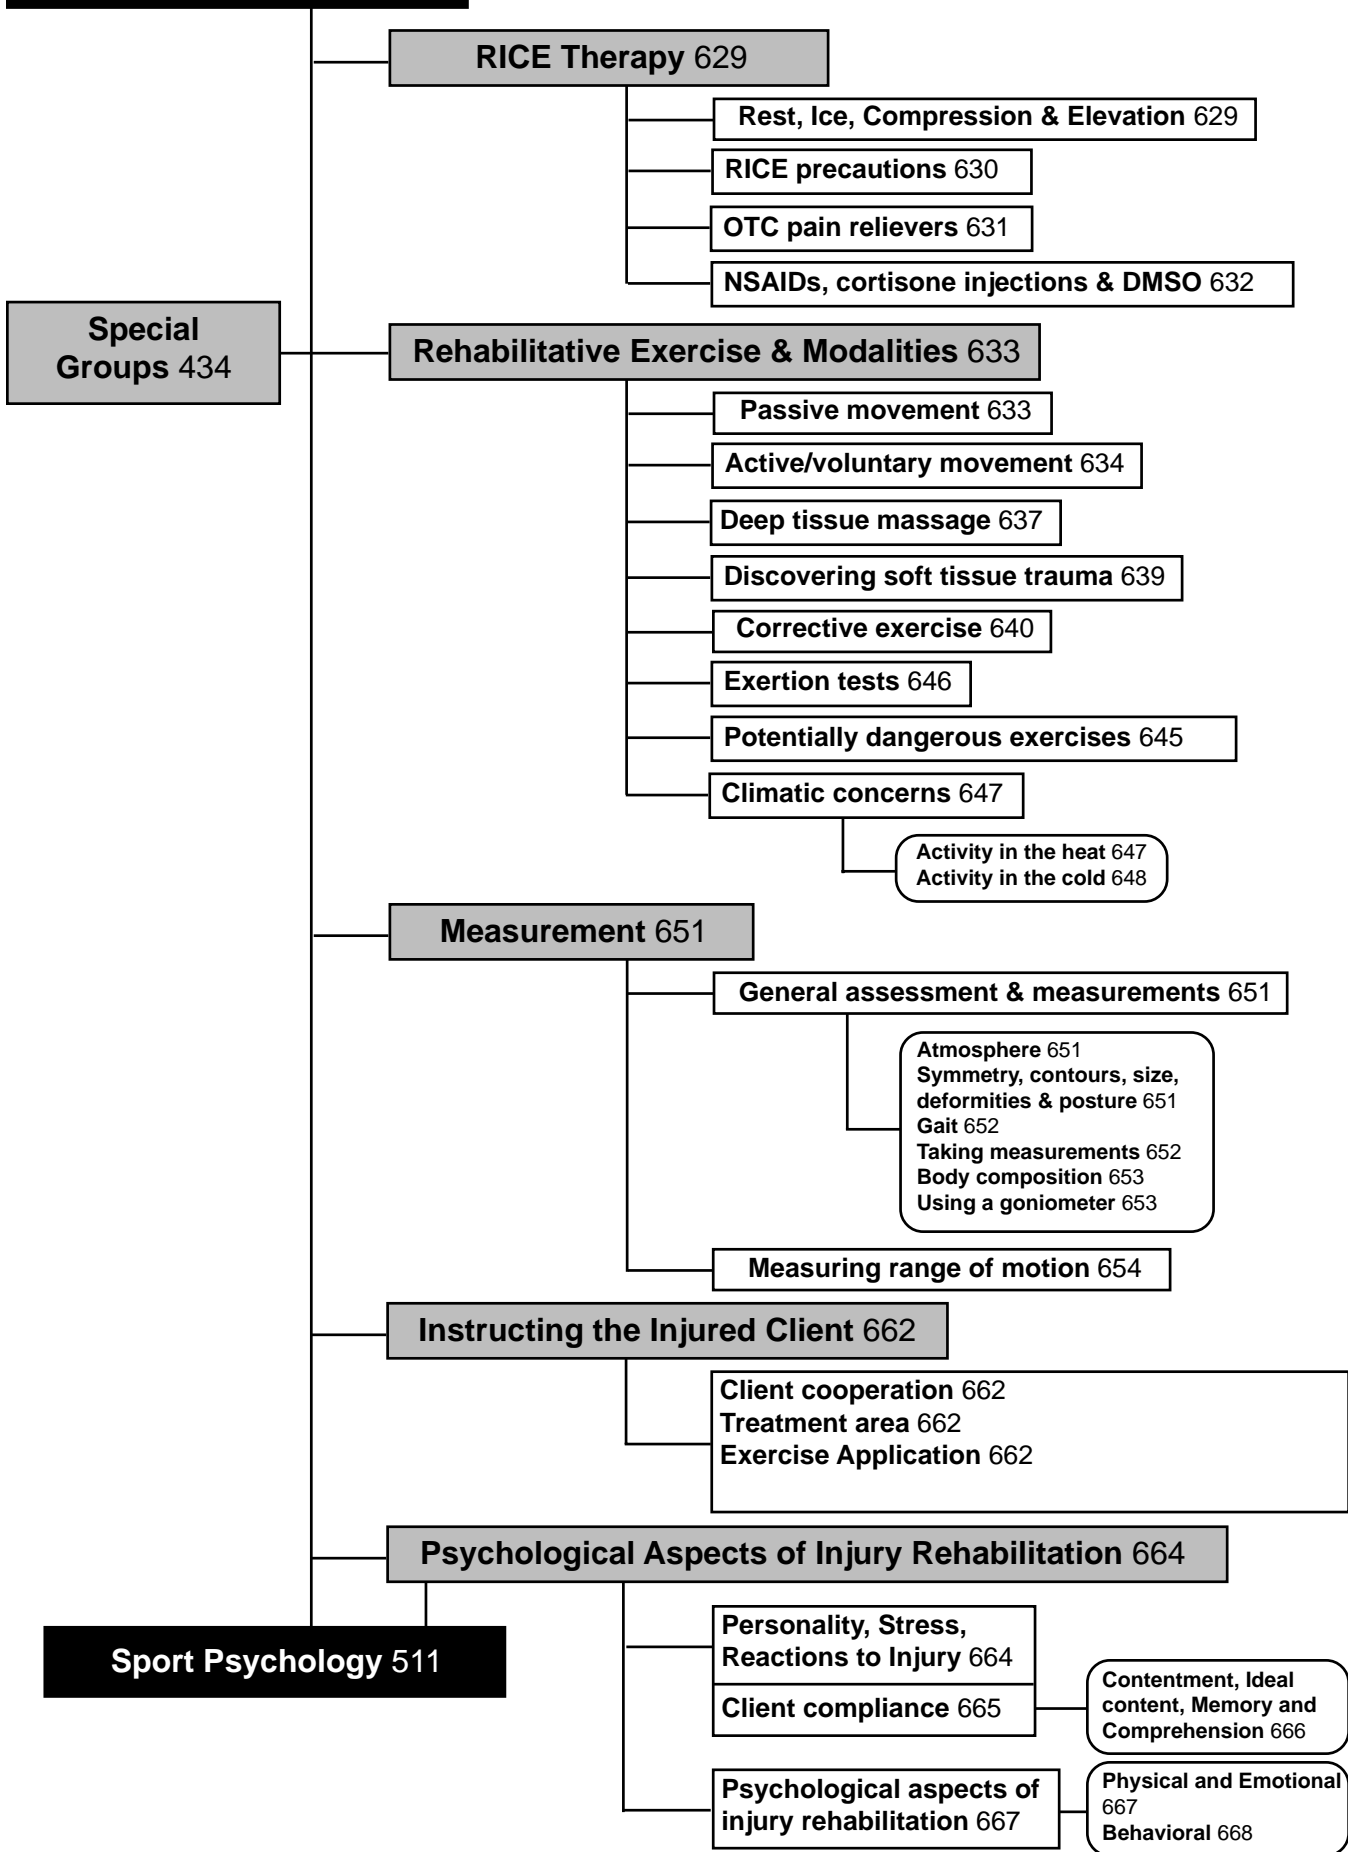

Exercise Substitutions 622

Exercise Avoidances and Precautions 623

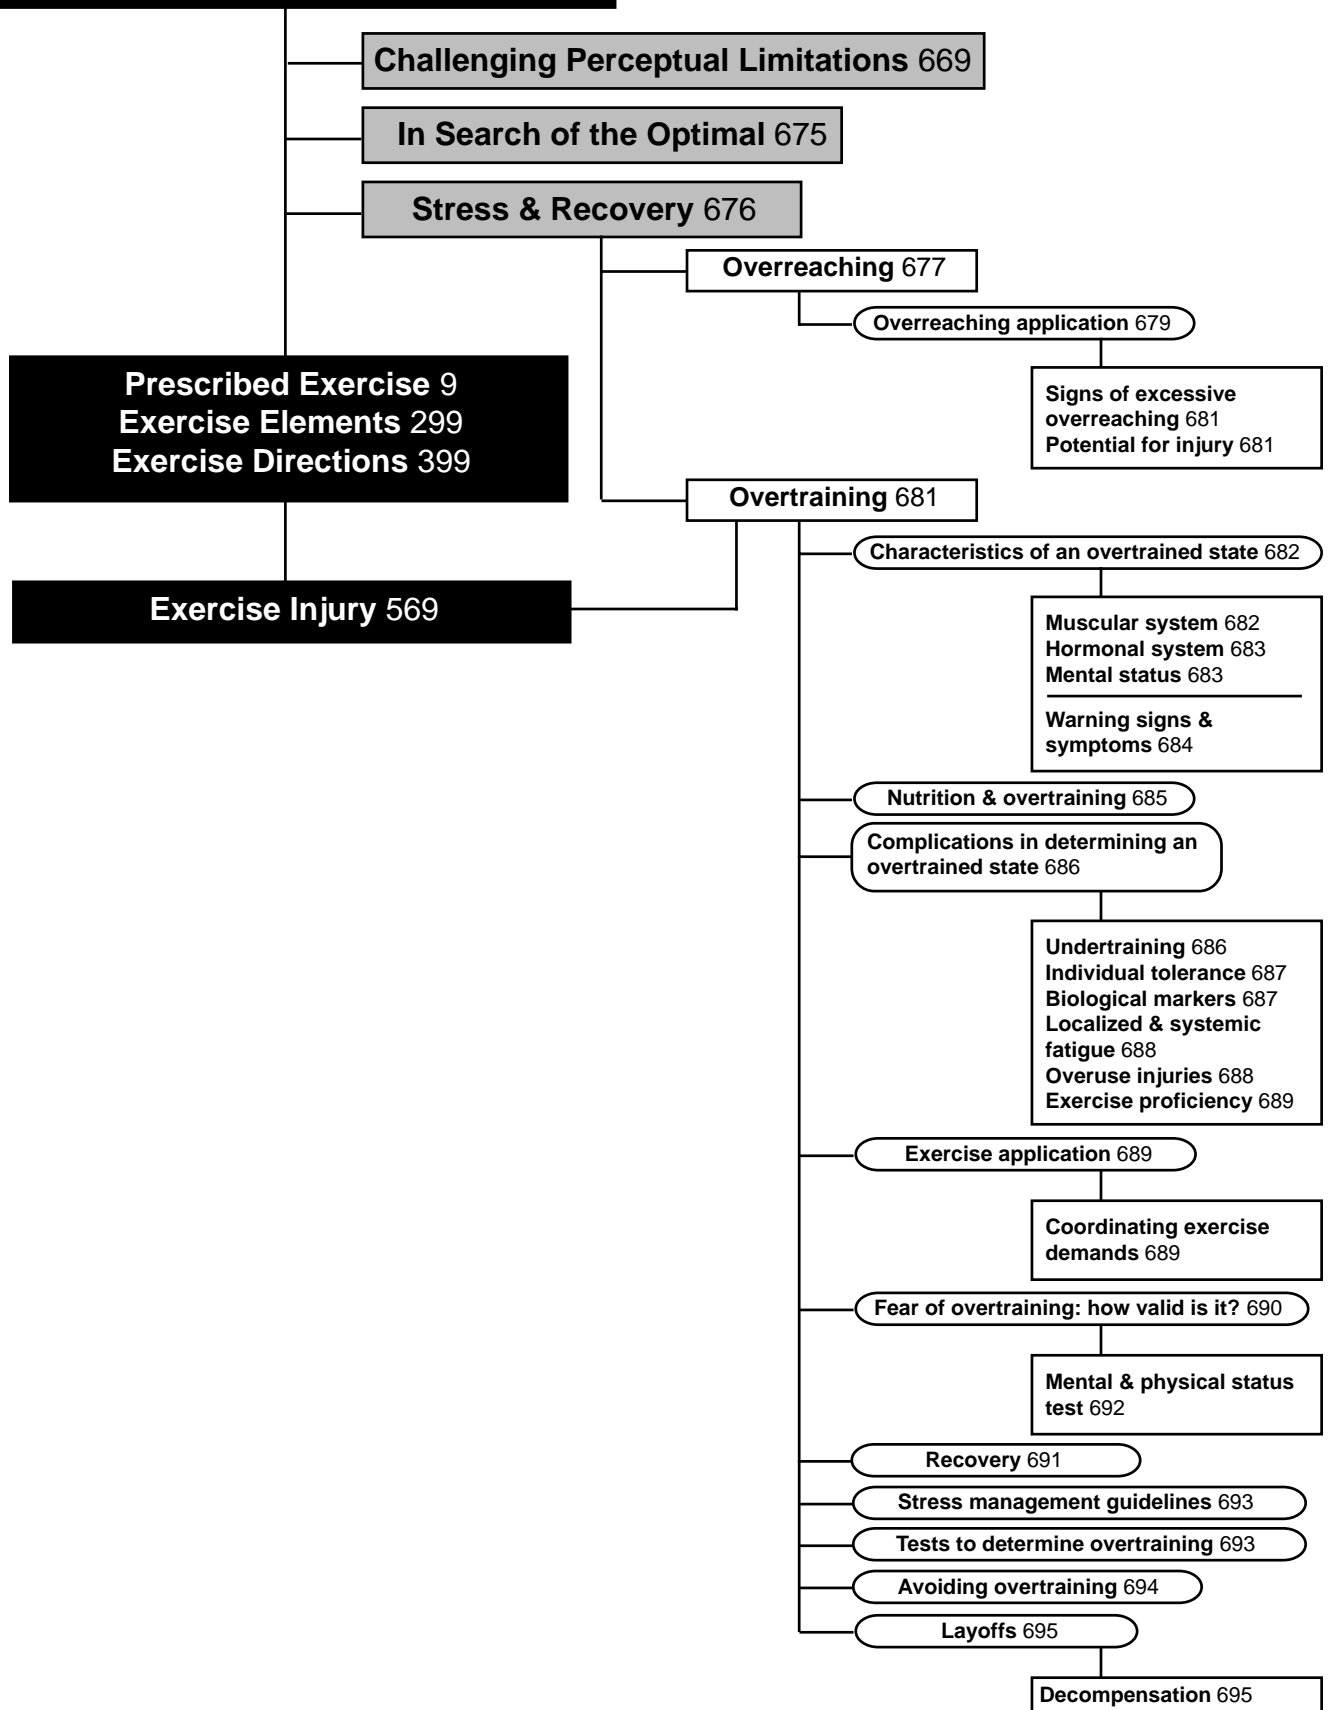

## Anabolic Steroids 625

Common side effects of anabolic steroid  
use and abuse 627

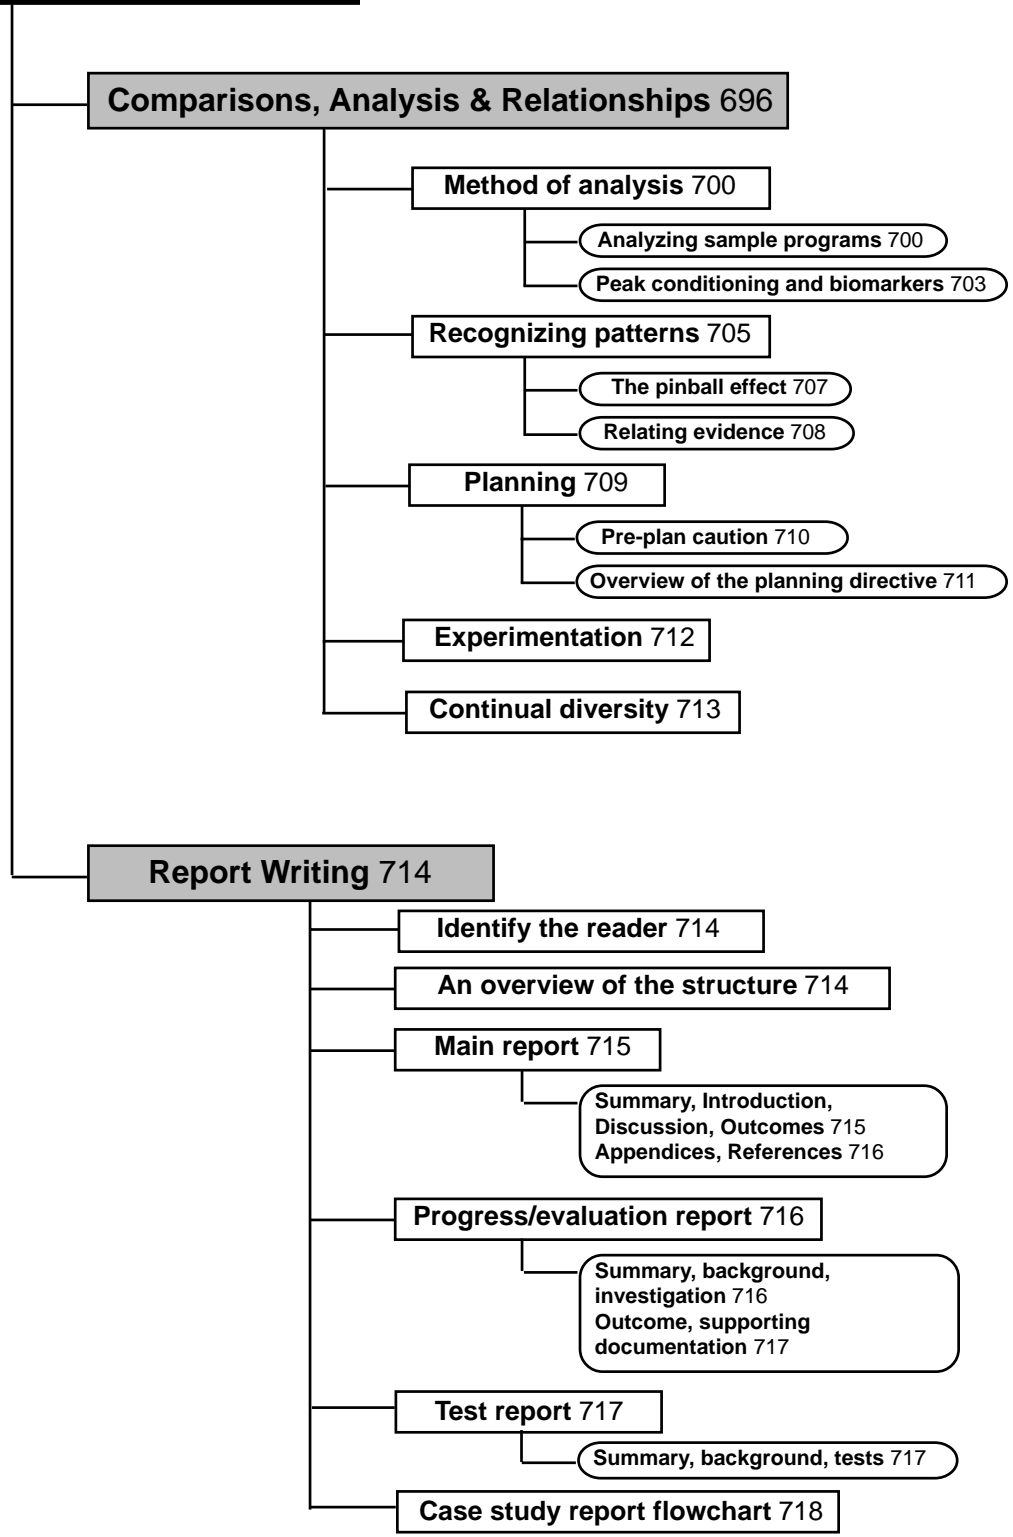

# Exercise Injury (con't)

# Problem Solving: Chpt Ten – 669

# Problem Solving: Chpt Ten – (con't)

## Comparisons, Analysis & Relationships 696

### Method of analysis 700

Analyzing sample programs 700

Peak conditioning and biomarkers 703

### Recognizing patterns 705

The pinball effect 707

Relating evidence 708

### Planning 709

Pre-plan caution 710

Overview of the planning directive 711

### Experimentation 712

### Continual diversity 713

## Report Writing 714

### Identify the reader 714

### An overview of the structure 714

### Main report 715

Summary, Introduction, Discussion, Outcomes 715  
Appendices, References 716

### Progress/evaluation report 716

Summary, background, investigation 716  
Outcome, supporting documentation 717

### Test report 717

Summary, background, tests 717

### Case study report flowchart 718

# Problem Solving: Chpt Ten – (con't)

Laws of Reality 94  
Philosophy 105  
Definitions 113

## Critical Thinking 719

### Abstracting ideas 719

### The argument 728

Background to reasoning 728

Confusion breeds confusion 728

### Argument specifics 731

Convincing your audience 732  
Validity vs. Truth 733  
Diagramming 736  
Logical indicators 738  
Hidden premises 740  
Limitations of knowledge 741  
Bias, distortion and propaganda 741  
Quality of relevancy 744

### Deductive reasoning 745

Categories of arguments 745

Types of deductive arguments 745

Hypothetical arguments 746

Syntax, short-forming arguments 746  
Only if... 748  
Steps in analyzing & chains 749

Alternative argument 751

Validity of alternative arguments 752

### Syllogism 755

Syllogistic components 755

Distribution 756

Restructuring syllogisms 757

Obversion, 757  
conversion and contraposition 759

5 Rules of syllogistic validity 759

Syllogistic square of opposition 764

Translation of interpretation using syllogisms 766

# Problem Solving: Chpt Ten – (con't)

## Critical Thinking (con't)

### Cause and Effect 96

### Inductive reasoning 768

Background to induction 768

Mill's Methods 774

Method of agreement 774  
Method of difference 775  
Method of concomitant  
Variations 775  
Method of residues 776

### Analogies 777

Types of analogies 777

Evaluating analogies 777

### Truth in claims 779

Background 779

Types of claims 781

Common sense claims 781  
Expert claims 782  
Observational claims 784  
Scientific claims 785

Grading claims 787

Sound reasoning 792

Truth behind statements 793

Hidden premises 796

Critiquing claims 799

Objectivity & Claim Analysis 807

Critiques:  
Mike Mentzer's Heavy Duty  
System 807  
The Joe Weider System 838  
Fleck & Kraemer's  
Periodization 885

Analysis fundamentals 911

Full Reasoning 912  
Organization of thoughts 912  
Sufficient knowledge of the  
topic 913  
Reliable resources 914  
Sufficient knowledge outside  
the topic 914

Making claims 916

Supporting premises/  
arguments 916

## Problem Solving: Chpt Ten – (con't)

### Critical Thinking (con't)

#### Logical fallacies 918

Accent, Amphiboly, Appeal to Emotions 918  
Appeal to the imagination, Appeal to laughter, Argumentum ad baculum, Argumentum ad hominem 919  
Argumentum ad hominem circumstantial, Argumentum from ignorance, Argumentum ad ignoratum, Argumentum ad misericordiam 920  
Argumentum ad verecundiam 921  
Black and white/false alternative, Cliche thinking 922  
Complex question, Confusing necessary & unique cause, Emphasizing irrelevant factors  
Equivocation 923  
Excerpt lifting, False cause, Gambler's fallacy, Hasty generalization 924  
Illicit redefinition, Improper analysis, Inconsistency, Induction by simple enumeration 925  
Irrelevant conclusion, Misuse of the mean, Neglected aspect 926  
Oversimplification/overgeneralization, Petitio principii, Post hoc ergo propter hoc 927  
Reversing cause and effect, Stolen concept, Reductio ad absurdum, Two wrongs make a right 928

## Conclusion – 929

## Appendices – 931

A: Sample Questionnaire 933

B: Fitness Stress Test 943

C: Fitness Testing Irrationality 947

D: Machines vs. Free Weights 951

E: Standards of Rigor 959

F: Understanding Eccentric Exercise 969

G: HIT and HVT Misunderstandings 975

H: Corruption of the New Physics 987

## Glossary – 1005
